

GLOBALTELECOM
In touch with the world

BT Services

Global Telecom offers you the BT range of products at lower rates than BT. Our unique agreement allows us to buy at wholesale prices your BT services. BT will continue to maintain your services on our behalf. Our prices reduce your cost keeping the identical quality.

Wholesale BT Services

Recent changes within BT's structure have allowed their customers to choose their supplier of their BT services.

With the set up of approved wholesalers BT will sell you service to Global Telecom at a wholesale price and we will then take ownership of your services and invoice you directly for that service.

The main difference for you is the reduced prices for the services you currently have and one point of contact for all you questions and support issues.

You can be confident that when you ring Global Telecom you will not have to be passed around numerous departments and held for minutes before getting the information you need.

Transferring Your Services

Switch your services to Global Telecom and we can transfer all your services and complete a like for like transfer. The switch will be seamless and we will bill you for your line rental and other services.

New installation of BT lines

Order your new line with us and we will arrange for BT to install the service for us. You can be confident in the support and skill of BT engineers completing the installation.

Low cost calls

As well as your low cost line rental you will also benefit from our competitive calls rates with per second billing and no minimum calls charges. The rates will be agreed at the time on sale added more to your overall cost saving by using Global Telecom
