## Diverts To Mobile

**Divert your non-geographic numbers to your mobile phone and answer all those calls without delay. No more calling your voicemail to retrieve old messages. Provide a instant response for you potential and existing customers.**

### Mobile Divert Services

Non Geographic services such as 0800, 0845, 0870, 0871 numbers can be diverted to a mobile phone. This is ideal for small business and allows you to answer all calls without the need of a UK land line number.

Traditionally companies and individuals divert their numbers to a land line answer phone and reply to messages in the evening or the next day therefore, Sometimes losing valuable business or important calls.

You don't have to call the office to collect your messages as we can divert these services direct to your mobile phone. The caller does not know their call is being diverted to a mobile phone and you can answer the call immediately saving valuable time and improving response times for your customers.

The normal prices apply for each service plus an additional monthly rental and additional increase on call charge to cover the cost of diverting the call to a mobile phone.

This services can be divert to one mobile phone and does not offer you the ability to switch between a landline number and then to a mobile number. It is easily set up and can be done within 24 hours.

Call the number below to discuss the many options that will benefit your organisation.

**Quick response to all callers**

**No calling to the office anymore to listen to your messages**

**More professional company image**

**No more lost business**

**Only a small monthly service charge**

**No long term contract**
